<b>Office Action Summary</b>	<b>Application No.</b> 10/582,073	<b>Applicant(s)</b> MAZIN, CEDRIC	
	<b>Examiner</b> ELIZABETH VOLZ	<b>Art Unit</b> 3781	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. This office action is responsive to the preliminary amendment filed on June 6, 2008. As directed by the amendment: Claims 1-5 have been cancelled and new Claims 6-10 have been added. Thus, Claims 6-10 are presently pending in this application.

#### ***Claim Objections***

2. Claim 10 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim can not depend on a canceled claim. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ellis (UK 1555031).

5. Regarding Claim 6, Ellis discloses a system for fixing a grip handle 5 (Figure 1) to a container 6 (Figure 1) of an item of cookware comprising a stud 10 (Figure 1) which comprises a body adapted to be fixed to the container and a flame guard 8 (Figure 1) which is adapted to surround the stud and which comprises a side wall (Figure 1 below) and an annular shoulder (Figure 1 below) projecting from the side wall to the interior and defining an opening through which extends the stud, wherein the stud comprises a flange ring 9 (Figure 1) which projects from the body to the exterior, a distance

Art Unit: 3781

separating the flange ring from an end of the body adapted to be fixed to the container and a distance separating the annular shoulder from an end of the side wall adapted to come into contact with the container are such that, when the handle approaches the container, the annular shoulder abuts against the flange ring just before the end of the side wall of the flame guard abuts against the container (Figure 1).

**Figure 1 (Ellis)**

6. Regarding Claim 7, Ellis discloses an annular shoulder (Figure 1 above) which is monobloc with the sides of the flame guard.

7. Regarding Claim 8, Ellis discloses a flange ring 9 (Figure 1) which is monobloc with a body of the stud 10 (Figure 1).

8. Regarding Claim 9, Ellis discloses a flange ring 9 (Figure 1) which is located at an end of the stud 10 (Figure 1) adapted to be fixed to the container 6 (Figure 1).

9. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims

Art Unit: 3781

“define a patentable invention” without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, “The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims.” Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
